Alaska Fjordlines will guide you on a trip that is educational, exciting and impressive. You will discover why these Alaskan waters are so rich and productive and attract so many whales. You will learn how individual humpback whales can be identified and how to interpret different whale behavior. You will learn to watch for whales with calves and to look for whales that are feeding, an exciting behavior that is often done in groups with many whales surfacing together. You will have the opportunity to see other marine wildlife, such as stellar sea lions, bald eagles, harbor seals, porpoise, and sea birds. It's not just a whale watch, but a marine wildlife cruise!

Expect to have fun! This is an experience of a lifetime. Our entire tour takes 4 hours

from downtown Juneau with 2 ½ hours on the water. You'll also see the historic Sentinel Island Lighthouse, Poundstone Rock and hear stories of the area shipwrecks and lighthouses.

Your whale watch will take place aboard the USCG certified M/V Fjordland, a 65', fast, stable catamaran that features a large heated cabin with big windows and a spacious, outdoor deck. It's the perfect boat for a comfortable yet intimate Juneau whale watching tour.
